

Third Party Hazardous Material Package Certification

Lansmont is certified by the US Department of Transportation to provide Third Party Hazardous Material Package Certification. Certification is available for Single, Combination, Infectious Material and Radioactive Packagings. Intermediate Bulk Containers tested at weights at or below 6000 lbs. can be certified as well.

Packages with plastic bags or bottles requiring heat seals must be filled and sealed prior to delivery to Lansmont. All other packagings can be filled on-site using water, antifreeze or various density solids as appropriate.

In addition to performance-oriented hazardous material package testing required by the US DOT, Lansmont also provides certification testing to the following standards:

- UN Recommendations on the Transport of Dangerous Goods
- ICAO Technical Instructions for the Safe Transport of Dangerous Goods by Air
- National Standard of Canada CAN/CGSB-43.150-97
- IATA Dangerous Goods Regulations

Services Include:

- Certification of Combination Packaging for Ground, Sea and Air
- Drop, Vibration, Stacking, Internal Pressure and Cobb tests per 49CFR §178 Subpart M
- Independent verification of Basis Weight, Burst and/or ECT
- Intermediate Bulk Containers, Single Packages, Infectious Material Packages and Radioactive Material Packages.
